# The secret is out.

## New Jersey's pension system is FAILING.

With the first public pension fund set to go broke in 2021,  
**the gap in funding would cost \$26,000 per resident to bail it out.**

# SAFEGUARD NEW JERSEY'S FUTURE!

**Our failing pension system already needs an additional \$26,000 per resident.**

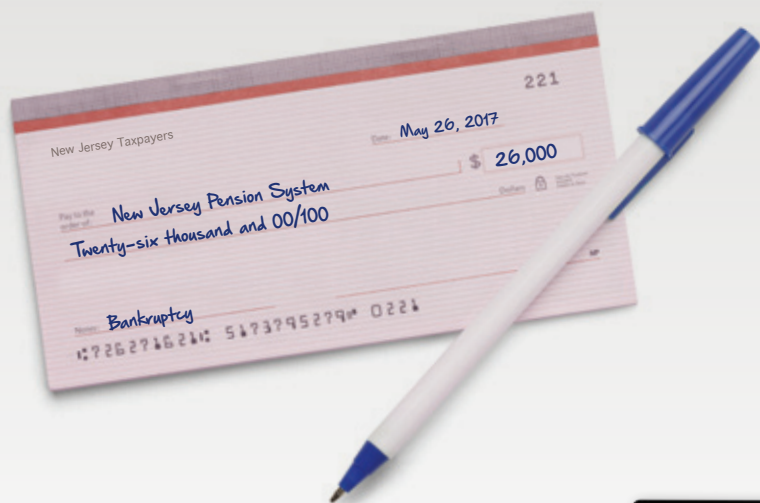

Without reform, New Jersey's \$235 billion in unfunded liabilities could **cost every resident at least \$26,000**. Commonsense reforms would prevent us from having to foot an even bigger bill.

## END "DOUBLE-DIPPING"

Too many government employees are collecting a salary and a pension at the same time. **By ending "double-dipping," New Jersey can save millions.**

## CUT WASTEFUL SPENDING

New Jersey already spends and taxes too much. Instead of raising taxes to fund our pension system, **we should cut wasteful government spending.**

**Sign the citizen pledge for pension reform today!**
