Q5. Pennsylvania lawmakers have proposed a constitutional amendment that would limit increases in government spending to the rate of inflation plus the rate of population growth. For example, if we had three percent inflation, and one percent population growth, government spending could increase no more than four percent that year. The limit could be exceeded with agreement from two-thirds of both houses of the General Assembly. Generally speaking, would you support or oppose this amendment? (Test Intensity...)

AFPPA - Cross Tabulation Report, September 2021

Q5. Pennsylvania lawmakers have proposed a constitutional amendment that would limit increases in government spending to the rate of inflation plus the rate of population growth. For example, if we had three percent inflation, and one percent population growth, government spending could increase no more than four percent that year. The limit could be exceeded with agreement from two-thirds of both houses of the General Assembly. Generally speaking, would you support or oppose this amendment? (Test Intensity...)
