LEGISLATIVE
AGENDA 2025

ECONOMIC OPPORTUNITY

Americans for Prosperity strives to create an economy that works for all—empowering people to earn success and realize their potential. The core beneficial role of state government is to protect the foundational rights necessary for people to control their own destiny.

TAXES

- Create a competitive market working towards a fairer, flatter, and simpler tax policy that unleashes growth and removes barriers to opportunities for all South Carolinians.
- Eliminate corporate handouts that pick winners and losers at the expense of hardworking taxpayers.

REGULATIONS

- Review existing regulations to determine what needs to be streamlined, and what can be taken off the books to create more economic opportunity.
- Require legislative approval for “major” rules that have an economic impact above a certain threshold.

OCCUPATIONAL LICENSING

- Give workers more freedom and flexibility through labor reform.

EDUCATIONAL FREEDOM

All students deserve the opportunity to discover, develop, and deploy their unique passions and talents. Instead of limiting families to a one-size-fits-all approach when it comes to education, we should expand their available choices so they can customize their student’s educational options in ways that best suit their unique needs.

- Fund every kid: families should be able to direct education funding on behalf of their children
- No more lines: students and families should be able to choose their public school, no matter where they live
- Education your way: All students enrolled in any form of school – including private, microschool, or homeschool – should be able to access public schooling on a course-by-course basis and for extracurricular activities

CONSTITUTIONALLY LIMITED GOVERNMENT

We envision a country where the government is limited and the rights of individuals are front and center. We stand for a strong system of checks and balances and a commitment to the rule of law, ensuring that everyone’s rights are respected and protected. Today, our fundamental freedoms—like free speech and fair trials—are under threat from those who believe the government should control more of our lives to achieve certain outcomes.

- First Amendment Protection: Free speech, freedom of association, and freedom of religion
- Judicial Reform: increasing transparency and accountability for the Judicial Selection Process

HEALTH CARE

South Carolinians have access to some of the world’s best doctors and treatments that people in other countries could only dream of. But a maze of government red tape has put access to quality, affordable health care out of reach for too many people.

Yet it doesn’t have to be this way. We’re working to make health care more affordable, less of a hassle, and transparent. How? With the Personal Option, a doctor-supported plan that puts you in control.

- Itemized Medical Billing: Increasing price transparency
